

React: Hooks

React – text

The following exercise contains the following subjects:

- ◆ useState

Instructions

Create a component that takes 2 props. A text as a string and a maximum length as an integer.

If the text is longer than the maximum length hide the remaining text.

You are able to read the rest of the text by clicking on read more and you are able to hide the text by clicking on show less.

Use the useState hook to control when it is hidden.

Demo:

Lorem ipsum dolor sit, amet consectetur adipisicing elit. Deserunt, quo aliquid? Id, nostrum beatae reprehenderit expedita animi assumenda voluptas illo pariatur esse sed facilis sapiente incidunt. Pe...[read more](#)

Lorem ipsum dolor sit, amet consectetur adipisicing elit. Deserunt, quo aliquid? Id, nostrum beatae reprehenderit expedita animi assumenda voluptas illo pariatur esse sed facilis sapiente incidunt. Perferendis natus praesentium quis. Nobis repellendus eligendi dolor illo dolore provident ratione quisquam, aspernatur error, voluptates ipsum culpa sunt, aliquam impedit excepturi sed aperiam!
