React: Ref

React – copy
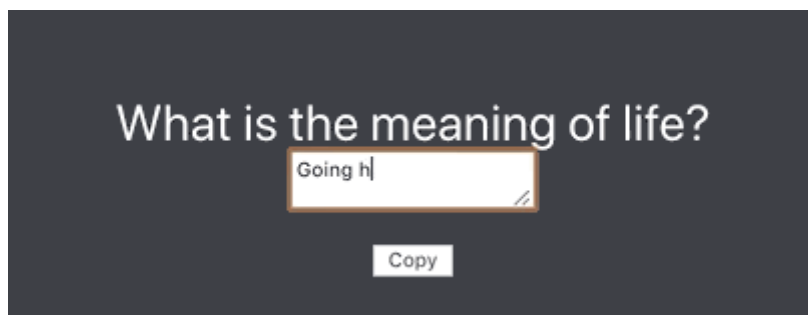

The following exercise contains the following subjects:

◆ ref

Instructions

We would like to use React to select a textarea's value and auto copy it.

Create a textarea and a button.

1) When clicking on the button, with the help of React's ref **select** the value of the textarea.

2) With the help of document.execCommand copy the value as well.

Submit the file to Hive.
